Dear District 200 Parents,

The State of Illinois now requires that Internet Safety be taught at least once each school year to all students in grade three and above. The purpose of this change in Illinois School Code is to address Internet safety education for students as they strive to meet 21st Century standards through the use of digital, visual, textual, and technological media.

Please be aware that District 200 will be implementing the delivery of Internet Safety Lessons at the elementary, middle, and high school levels. Below you will find a list of websites which may be utilized in meeting these safety goals.

In closing, research supports the importance of adult involvement and education as significant factors in helping young people to make wise online decisions. By working together we can all support District 200's commitment to keeping students safe while using the Internet. If you have questions or concerns, please contact the LLC Director at your school.

Sincerely,

District 200 Library Learning Center Directors
