

## Frogs

This activity was based on the book Over the Meadow. This particular sensory-motor group focused on frogs.

Vestibular: The children were “frogs on a log” (tunnel) and rolled on their bellies into the pond.

Balance/Body Scheme: The children jumped on lily pads 1-5 and had to imitate a different motor movement such as stand on one leg, stomp feet, spin around, etc.

Eye Hand Coordination: The children tossed frog toys into a bucket (the “pond”)

Proprioceptive: The children jumped like frogs into the pond. Then they took turns stomping and catching the frog from the Froggio game.

Fine-Motor: Each child made their own frog
