

Activity

Where Is ---?

Encourage your child to move around at home and outside. Let your child:

- Climb in and out of boxes, go on, under, over or around furniture and other things.
- Talk about what your child is doing (You climbed *on* the couch; You got *inside* the car).
- Talk about the location of things your child is interested in (The duck is *in* the pond).
- Ask your child to tell you where people and things are (Where is Grandma?)

Hints

Where Is ---?

To help your child succeed, you can:

- Play games (e.g., Horsie) where you move your child and describe the movements (*Up, Down*).
- Sing songs together that describe where things are and how things move (e.g., The wheels on the bus go *up* and *down*).
- Move together in and out, on top of and under objects. Talk about where you are (We are *under* the tree).

To make this activity more challenging, you can:

- Ask your child to put things in places (Put your coat *on* the bed; Put the blocks *in* the box).
- Use more difficult words like *between, next to, in front of, behind, in the middle*.
- Hide something and give your child hints on where to find it (It's *behind* a red box).
- Look at pictures and talk with your child about where things are (Spot is hiding *under* the blanket).
- Look at pictures and ask your child to tell you where things are (Where is the fish?)
